Available function list for each compatible device

av1008-62

【 Configure Devices 】
Up to 1024 cameras/encoders can be registered.
Authentication:Supports Basic authentication method.

①Search / Add / Delete Cameras
*1 Detects the devices within the same network segment automatically.
*2 IP addresses will be assigned to the devices.
⇒For security reason, about 20 minutes after turning on the power, the network settings of the target device may not be able to be changed and/or target devices are failed to detect.
(# : Network Mode "Auto" and "Advanced" are not available.)
*3 the settings will be downloaded from checked the camera.
*4 the image from the camera will be displayed with web browser.

②Scene Selection Image Quality
*5 JPEG Snapshot will be downloaded.
(# : Some cameras, JPEG Snapshot of the specified resolution will not be downloaded.)
*6 Configure the settings relating to image quality from the following.
・The image of the location where the camera is in use (Scene Selection).
・The image being monitored (Image Adjust).

③Configure Devices
*7 Configure the settings of cameras at a time.
→Refer to the operating instructions of the device in use for further information.
#1:"VMD" setting operation is not supported.
#2:When you change the "Imaging mode" with "VMD=On" setting, this setting may be changed as "VMD=Off" at the camera sideregardless of the operation and/or display on this tool. When you change the "imaging mode", re-check the VMD setting of the camera and confirm the VMD actual detecting operation.
#3:"Upside-down" setting operation is not supported.

④Maintenance
*8 Setting Data/HTML Initialization or Restart will be executed.

⑤Send a CGI List
*9 CGI Commands will be sent to the selected cameras.

⑥Image View Reporting Wizard
*10 Acquire the current JPEG Image from the camera(s) and outputs to the report.
(#1:Device existing in the same segment is supported.)
(#2:Part of detailed information such as firmware version etc. is not supported.)

【 Configure Recorders 】

①Create and/or Edit the Recorder Configuration File
(→Refer to the operating instructions of the device in use for further information.)
*1 Some settings will be restricted as follows.
・Basic - Time & date: Only the display settings of the time & date can be configured. The current time cannot be adjusted.
・User management - Administrator: Edit of administrator information, edit and deletion of the user information are available on the user page.
・Network - Basic: It is impossible to configure from this software.
・Maintenance : It is impossible to configure from this software.

*2 Some settings will be restricted as follows.
・Quick settings: It is impossible to configure from this software. The current time cannot be adjusted.
・Camera - NW camera: Only registration of network cameras is available. Interchange of order of the camera number is unavailable. Displaying of the thumbnail is unavailable.
・Config. : It is impossible to configure from this software.

*3 Some settings will be restricted as follows.
・Camera - NW camera: Only registration of network cameras is available. Interchange of order of the camera number is unavailable. Displaying of the thumbnail is unavailable.
・HDD management : It is impossible to configure from this software.

*4 Some settings will be restricted as follows.
・Quick settings: It is impossible to configure from this software. The current time cannot be adjusted.
・SD5Link : It is impossible to configure from this software.
・Event - VMD - Area: It is impossible to configure from this software.

②Convert the Recorder Configuration File to Text File
*5 Recorder Setup file (Binary data) will be converted into Text data.
