System970 i-PRO Management System Extends Scalability with New WV-ASE902 Extension Software

Panasonic, a leading company of video surveillance cameras and solutions, released new extension software for the System970 i-PRO Management System. With the new WV-ASE902 extension software, the System970 increases efficiency of video surveillance operation by displaying up to 64 video sources on the monitor screens. The WV-ASM970 client of System970 with the WV-ASE902 supports up to four monitor displays with 16-screen split and one operation display, resulting in 64 monitor windows per client system.

The System970 i-PRO Management System is a feature-rich, high-reliable, scalable and flexible IP-based video surveillance management system that manages up to 2,048 network and analog cameras, up to 64 IP and digital recorders, application servers and more. Designed based on distributed system architecture, the System970 is ideal for medium to large installations and multi-site systems. The System970 also offers a smooth and cost-effective migration path from an existing analog video surveillance system to an IP-based system.

The WV-ASE902 extension software is available with the version 10 or later of the WV-ASC970 and WV-ASM970 IP Matrix Server/Client Software of System970.
