

[Important Information]

Vulnerability in WPA2 of wireless LAN has been announced. In our network cameras, WV-SW174W, BL-VT164W and BL-VP104W are using WPA2. So, we have been working its countermeasures.

Meantime, please use the above cameras with the either configuration as follow until new firmware is released.

- Please consider using wired LAN without using wireless LAN.
- Change the camera setting to SSL

--- Updated information as of January 29, 2018 ---

We have released new firmware for the above models. So, we strongly recommend you to upgrade your above camera(s) promptly.

--- Updated information as of January 22, 2018 ---

We have planned releasing new firmware for the above models by the end of this month.
