

VER Release Date	Priority Rank Level				Contents
	A	B	C	U	
2.0.3 Oct, '08	U				x First Release ND400 (Ver1.0/1.1),ND300(Ver4.5/4.6)
2.1.2 Dec., '08	U				x Add "get Log" Function Add IP Camera Function NP24x(Ver1.5x/1.6x),NS202A(Ver2.4x/2.5x),NF28x(Ver1.3x/1.4x),NW484(1.3x/1.4x),NS95x/NW96x(1.3x/1.4x),NF302/NP304(1.3x/1.4x)
2.2.0 Feb.'09	U				x ND400 (ver1.2/1.3) Compatible
2.3.0 July.09	U				x Change ND400 Log Directory Extend Download Time When used with ND400 with HDE400
2.4.0 Nov.09	U				x Add New Products Upload/Download WV-NP502/NW502 Add Off Line Capability (with out connect products can setup information) Add Log get function for NT304/NT314
2.5.0 Feb.10	U				x Supported new firmware as follows, WV-NP244 - V1.80 / WV-NF284 - V1.6/WV-NS202, NS202A - V2.70/WV-NS950, WV-NW960 - V1.60/WV-NW484S - V1.60/WV-NF302, WV-NP304 - V1.60 WJ-HD616, WJ-HD716 - V1.06
3.2.0 Aug.10	U				x <b>1.i-Pro Configuration Setup</b> SETUP ND400 Ver.2.1 or later supported. SETUP data download/upload : NP502/NW502 Ver.1.10 or later & New products supported Software version up for new products supported. Get log for New products supported. NF28x:before V1.40, NP24x:before V1.25, NP100x:before V1.24 serial no. get process bug fixed. <b>2.i-PRO Easy Setup Software</b> Desktop icon: color, Search products process do not detect products which setting cannot be changed (20min after Power/up etc), etc changed. (minor change)
3.3.0 Dec.10	U				x <b>1.i-Pro Configuration Setup</b> Delete "Initial setup of 'i-PRO system". * Function move to "i-PRO EASY Setup Software". Recorder administrator console supports "ND400 Ver 2.2x". Supported new products : SP102,105(V1.0x), SC385(V1.0x), NV200(V1.0x) Version up function enhanced (Mixed models version up support) Supported new products log download : SP102,105(V1.0x), SC385(V1.0x), NV200(V1.0x) Support nn-default Dina-default Password on recorders with "Upload/Download the setup file", "Download the log files". <b>2.i-PRO Easy Setup Software</b> New products support : SP102, SC385, BB-HCS301 New Firmware support : ND400 V2.2 ND300 V5.2 ND200 V3.3x Change setup parameter of Recording Quality (High only) Camera icon changed as NV200.
3.4.0 July.11	U				x <b>1.i-Pro Configuration Setup</b> Supported new compo. WV-SW395,-SC384, -SW355, -SW352, -SF346, -SF342 Allow to set the start address of "Auto(Assign available IP addresses automatically)" "Recorder administrator console" supports "ND400 Ver 2.4x". "Download the setup file" supports ND400 V2.4* , NV200 V1.10, preset position flag data of SC385. "Upgrade the firmware" supports ND400 V2.4* , NV200 V1.10 "Download the log file" ND400 V2.4* , NV200 V1.10 <b>2.i-PRO Easy Setup Software</b> Supported new compo. WV-SW395,-SC384, -SW355, -SW352, -SF346, -SF342, Switch-M24DCPWR,-M16eG,- Supported ND400 V2.4* Increased the number of camera connection (ND400:Max64, ND300(A):Max32) in case of "OtherSwitch" selected on "Device Connection" screen. Depend on BB/BL camera recording mode, BB/BL camera VMD setting becomes valid/invalid * Schedule rec on : invalid , other recording mode : valid

3.5.0 Jan, '12					<p>Priority Rank Level                      A : Recommend to apply (Major or serious update)                      B : When issue happened                      C : Maintenance timing                      U : Function /Performance improvement (Not Necessary to update)</p> <p><b>1.i-Pro Configuration Setup</b>                      Supported new compo. WV-SW395,-SC384, -SW355, -SW352, -SF346, -SF342                      supports "ND400 Ver 2.5                      "Download the setup file" supports ND400 V2.5,NV200 V1.20                      "Upgrade the firmware" supports ND400 V2.5,NV200 V1.20</p> <p><b>2.i-PRO Easy Setup Software</b>                      Supported new compo. WV-SW155/152,SF132/135,                      Supported ND400 V2.5</p>
3.6.0 April, '12					<p><b>1.i-Pro Configuration Setup</b>                      Supported new camera. WV-SC386, WV-SW396, WV-SW316L / 316 / 314(NTSC only) / WV-SP509 / 508, WV-SW559 / 558, WV-SW175 / 172, WV-ST165 / 162.                      "Download /Upload the setup file" /"Upgrade the firmware" /"GetLog File"</p>
3.7.0 June, '12					<p><b>1.i-Pro Configuration Setup</b>                      Supported new camera;                      WV-SF548, WV-SF549, WV-SF538, WV-SF539, WV-SW174W, BL-VT164W, BL-VT164, BL-VP104W, BL-VP104, BL-VP101 and WV-TW310.                      Supported new version on DVRs;                      WJ-ND400 (Ver 3.0 and Ver 3.1), WJ-NV200 (Ver 1.3 and Ver 1.4), WJ-HD616 (Ver 2.2) and WJ-HD716 (Ver 2.2).                      Fixed an issue that HD616/HD716 cannot retrieve setups if VMD area were full of screen.                      Added new function;                      In registration of new cameras on ND400: supported copy &amp; paste function at list of user name.                      Added a new choice "Custom "at language on HD616/HD716 to support language customized.                      User mng. on HD616/HD716: supported retrieving NULL data as user name who is enabled.                      Face matching data on NV200, supported downloading and uploading data file.                      RS-485 control file on GXE500, supported uploading data file.                      On NV200, supported obtaining results (CSV-format) of face matching function.                      On ND400, NV200, HD616 and HD716, supported obtaining number of UID (Max and in used).                      On ND400, NV200, HD616 and HD716, supported obtaining recording information.                      Fixed an issue that system log (screen of browser for cameras) was not shown properly.</p>
3.8.0 Dec, '12					<p><b>1. Initial setup of 'i-PRO system'</b>                      Supported new components: WV-SF438, WV-SW458/WV-SW458M, Switch-M8eGPWR+, Switch-M12eGPWR+, Swicth-M48eG                      Supported new version of firmware: WJ-ND400(v3.2), WJ-NV200(v1.5), WV-SP509, WV-SP508, WV-SW559, WV-SW558, WV-SF549, WV-SF548, WV-SF539, WV-SF538</p> <p><b>2.Setup software of the recorder</b>                      Supported new components: WV-SF438, WV-SW458/WV-SW458M                      Supported new version of firmware: WJ-ND400(v3.2), WJ-NV200(v1.5), WV-SP509, WV-SP508, WV-SW559, WV-SW558, WV-SF549, WV-SF548, WV-SF539, WV-SF538</p> <p><b>3.Download the settings from the device</b>                      Supported new components: WV-SF438, WV-SW458/WV-SW458M, Switch-M8eGPWR+, Switch-M12eGPWR+, Swicth-M48eG                      Supported new version of firmware: WJ-ND400(v3.2), WJ-NV200(v1.5), WV-SP509, WV-SP508, WV-SW559, WV-SW558, WV-SF549, WV-SF548, WV-SF539, WV-SF538</p> <p><b>4.Upload the setup file to the device</b>                      Supported new components: WV-SF438, WV-SW458/WV-SW458M, Switch-M8eGPWR+, Switch-M12eGPWR+, Swicth-M48eG                      Supported new version of firmware: WJ-ND400(v3.2), WJ-NV200(v1.5), WV-SP509, WV-SP508, WV-SW559, WV-SW558, WV-SF549, WV-SF548, WV-SF539, WV-SF538                      Supported uploading custom language file for camera.</p> <p><b>5.Upgrade the firmware</b>                      Supported new components: WV-SF438, WV-SW458/WV-SW458M                      Supported new version of firmware: WJ-ND400(v3.2), WJ-NV200(v1.5), WV-SP509, WV-SP508, WV-SW559, WV-SW558, WV-SF549, WV-SF548, WV-SF539, WV-SF538                      Shortening of times for updating camera firmware.</p> <p><b>6.Download the logs from the device</b>                      Supported new components: WV-SF438, WV-SW458/WV-SW458M, Switch-M8eGPWR+, Switch-M12eGPWR+, Swicth-M48eG                      Supported new version of firmware: WJ-ND400(v3.2), WJ-NV200(v1.5), WV-SP509, WV-SP508, WV-SW559, WV-SW558, WV-SF549, WV-SF548, WV-SF539, WV-SF538                      Fixed an issue: failure to retrieve logs on ND200/ND300A.</p> <p><b>7.Other</b>                      Fixed an issue: Unable to receive network information in cases the PC has two or more NICs (Network Interface Cards).</p>

4.5.0 Sept.,'14	C				<p><b>1. Initial Setup;</b>                      x - Supported new components: WV-SFN310, WV-SFN311, WV-SFR310, WV-SFR311, WV-SFV310, WV-SFV311, WV-SPN611, WV-SPN631 and WV-SMR10.</p>
				x	<p><b>2. Configure Cameras;</b>                      - Supported new components: WV-SFN310, WV-SFN311, WV-SFR310, WV-SFR311, WV-SFV310, WV-SFV311, WV-SPN611 and WV-SPN631.                      - Fixed issues:                      Supported changing only Administrator password.                      IP address at assigning multicast address [Added "1" to the 4th octet in IP address when assigning multicast address for H.264(2)].</p>
					<p><b>3. Configure Recorders;</b>                      x - Made the configuration file a text.                      - Supported new firmware version: WJ-NV300(v1.1).</p>
					<p><b>4. Download Configuration Files</b>                      x - Supported new components: WV-SFN310, WV-SFN311, WV-SFR310, WV-SFR311, WV-SFV310, WV-SFV311, WV-SPN611, WV-SPN631 and WV-SMR10.                      - Supported new firmware version: WJ-NV300(v1.1).</p>
					<p><b>5. Upload Configuration Files</b>                      x - Supported new components: WV-SFN310, WV-SFN311, WV-SFR310, WV-SFR311, WV-SFV310, WV-SFV311, WV-SPN611, WV-SPN631 and WV-SMR10.                      - Supported new firmware version: WJ-NV300(v1.1).</p>
					<p><b>6. Upgrade Firmware</b>                      x - Supported new components: WV-SFN310, WV-SFN311, WV-SFR310, WV-SFR311, WV-SFV310, WV-SFV311, WV-SPN611, WV-SPN631 and WV-SMR10.                      - Supported new firmware version: WJ-NV300(v1.1).</p>
					<p><b>7. Download Log Files</b>                      x - Supported new components: WV-SFN310, WV-SFN311, WV-SFR310, WV-SFR311, WV-SFV310, WV-SFV311, WV-SPN611, WV-SPN631 and WV-SMR10.                      - Supported new firmware version: WJ-NV300(v1.1).</p>
5.0.0 Dec.,'14	U				<p><b>1. General</b>                      - "Initial Setup" was moved into "Configure Cameras".                      - "Download Configuration Files" and "Download Log Files" were merged as "Download Configuration &amp; Log Files".                      - No longer support old recorders and cameras;                      Recorders: WJ-HD3** series, ND300 series and ND200 series.                      Cameras: WV-NP240/NP244 series.                      x - Changed target folder at installation and icon so that both version 4.5 and version 5.0 can be installed on a PC.                      - Changed recommended system;                      OS: Removed Windows Vista                      CPU: Changed to "Intel Core i5 2.5 or greater".                      Display: Changed to "1280 x 800 pixels or greater".                      .Net Framework 4.5: Changed to "VS2013 VC++, Redistributable package".</p>
					<p><b>2. Configure Cameras;</b>                      - Added new function;                      Visible effectiveness of before/after changing Scene Selection Image Quality.                      Added parameters for H.264(3)(4) to adjust image.                      Merged settings of camera parameters and Set/Load of Camera Configuration List.                      x Added notification of error at Camera Configuration List (Row/Column).                      Retrieved settings for network and IP address of Initial Setup on Version 4.5                      Changed default target folder to save files.                      Changed default target folder to save files.                      Improved operability by changing layout.                      - Supported new components: WV-SPW631L series, WV-SPW531L, WV-SPN311, WV-SPN310, WV-SPN531.</p>
					<p><b>3. Configure Recorders;</b>                      x - Supported new firmware version: WJ-ND400(/K)(v4.3/v4.4).</p>

	A	B	C	U	Description
5.0.0 Dec., '14	U				<b>4. Download Configuration &amp; Log Files</b> - Added new function; Search devices. Location to save files can be changed. Options page x Changeable Number of Operations in parallel and use/not use PING. Changeable Search time and definable "Administrator User name" and "Password" depends on devices. - Supported new components: WV-SPW631L series, WV-SPW531L, WV-SPN311, WV-SPN310, WV-SPN531. - Supported new firmware version: WJ-ND400/(K)(v4.3/v4.4), WJ-NV300(v1.1), WJ-NV200(v2.3).
					<b>5. Upload Configuration Files</b> - Added new function; Search devices. Location to save files can be changed. Options page x Changeable Number of Operations in parallel and use/not use PING. Changeable Search time and definable "Administrator User name" and "Password" depends on devices. Misc. with "Uploading Configuration Files" - Supported new components: WV-SPW631L series, WV-SPW531L, WV-SPN311, WV-SPN310, WV-SPN531. - Supported new firmware version: WJ-ND400/(K)(v4.3/v4.4), WJ-NV300(v1.1), WJ-NV200(v2.3).
					<b>6. Upgrade Firmware</b> - Added new function; Search devices. Location to save files can be changed. Options page x Changeable Number of Operations in parallel and use/not use PING. Changeable Search time and definable "Administrator User name" and "Password" depends on devices. Selectable if configuration to be restore default. Selectable if overwritten camera title, address for multicast / port number, configuration on recorder. - Supported new components: WV-SPW631L series, WV-SPW531L, WV-SPN311, WV-SPN310, WV-SPN531. - Supported new firmware version: WJ-ND400/(K)(v4.3/v4.4), WJ-NV300(v1.1), WJ-NV200(v2.3).
5.1.0 Apr., '15	U				<b>1. General</b> - Added new function; Improved quality of icons on toolbar. - Fixed the issues as follows: x Unable to change connection mode to multiple devices. Displayed incorrect Default Gateway address and Subnet mask when detecting WJ-NV300 and WJ-NV200. - Supported new components: WV-SFV481, WV-SFN480, WV-SPW611 series and WV-SPW310 series. - Supported newest firmware version (only when detecting and starting browser): WJ-NV300(v1.2)
					<b>2. Configure Cameras;</b> - Added new function; For WJ-ND400, configure cameras such as model, image capture mode, frame rate, resolution, image quality. Autocomplete function for inputting model numbers of cameras at Configure Cameras. x Example: listing all models those contain "sf" when typing "sf". - Supported new components: WV-SFV481, WV-SFN480, WV-SPW611 series and WV-SPW310 series. - Supported new firmware version (only when detecting and starting browser): WJ-ND400/(K)(v4.5)
					<b>3. Configure Recorders;</b> - Added new function; x Supported discontinued models such as WJ-HD3xx, WJ-ND300, WJ-ND200, WV-NP244 by switching exclusive screen for the models. - Supported new components: WV-SFV481, WV-SFN480, WV-SPW611 series and WV-SPW310 series. - Supported new firmware version (only when detecting and starting browser): WJ-NV300(v1.2) and WJ-ND400/(K)(v4.5)

5.1.0.6 Apr., '15	U				<b>4. Download Configuration &amp; Log Files</b> - Added new function; Supporting discontinued models such as WJ-HD3xx, WJ-ND300, WJ-ND200, WV-NP244 by switching exclusive screen for the models. x Displaying the reason why setting menu failed uploading while operated by another user. - Supported new components: WV-SFV481, WV-SFN480, WV-SPW611 series and WV-SPW310 series. - Supported new firmware version (only when detecting and starting browser): WJ-NV300(v1.2) and WJ-ND400(K)(v4.5)
					<b>5. Upload Configuration Files</b> - Added new function; x Supported discontinued models such as WJ-HD3xx, WJ-ND300, WJ-ND200, WV-NP244 by switching exclusive screen for the models. - Supported new components: WV-SFV481, WV-SFN480, WV-SPW611 series and WV-SPW310 series. - Supported new firmware version (only when detecting and starting browser): WJ-NV300(v1.2) and WJ-ND400(K)(v4.5)
5.1.0.7 Apr., '15	C				x Fixed an problem at upgrading firmware for WV-SPW310 / SPW311L / SPW611 / SPW611L.
5.2.0.4 June, '15	C				x <b>1. Initial Setup;</b> - Supported new components: WV-SW397, WV-SC387, WV-SPN533H, WV-SPN313H.
					x <b>3. Configure Recorders;</b> Improved configuration procedure for setting up schedule per camera (1 to 8) at Time table in Schedule on WJ-ND400.
					x <b>4. Download Configuration Files</b> - Supported new components: WV-SW397, WV-SC387, WV-SPN533H, WV-SPN313H.
					x <b>5. Upload Configuration Files</b> - Supported new components: WV-SW397, WV-SC387, WV-SPN533H, WV-SPN313H.
			x <b>6. Upgrade Firmware</b> - Supported new components: WV-SW397, WV-SC387, WV-SPN533H, WV-SPN313H. - Fixed an issue that unable to upgrade firmware by firmware files for BL-VP101 / BL-VP104 / BL-VP104W obtaining from Panasonic Global site ( <a href="http://security.panasonic.com/pss/security/library/products.html">http://security.panasonic.com/pss/security/library/products.html</a> ).		
5.3.0.2 Aug., '15	C				x <b>2. Configure Cameras;</b> - Made configuration more efficient by copying setting values other than IP address (Connection mode/Subnet mask/default Gateway port number) to 2 or more cameras with check mark when assigning IP address manually. x - Made configuration more efficient by assigning IP address automatically and batch transmission to 2 or more cameras with check mark. - Supported new components/new firmware: WV-SPV781L, WV-SFN531, WV-SFR531, WV-SFV531 WJ-ND400(v5.0), WJ-NV300(v1.3) : Only for Search and start running web browser.
					x <b>3. Configure Recorders;</b> - Supported new firmware: WJ-ND400(v5.0), WJ-NV300(v1.3) : Only converting Setup file (Binary data) into Text data. - Fixed an issue that Configure Recorders could not load camera configuration files as follow; WV-SP104W was(were) registered. WJ-ND400 was between version 4.1 and 4.2 and WV-SW115 was(were) registered.
					x <b>4. Download Configuration &amp; Log Files</b> - Supported new components: WV-SW397, WV-SC387, WV-SPN533H, WV-SPN313H.
					x <b>5. Upload Configuration Files</b> - Supported new components/new firmware: WV-SPV781L, WV-SFN531, WV-SFR531, WV-SFV531 WJ-ND400(v5.0), WJ-NV300(v1.3)

Except Chinese market models. (3) WJ-NV250(V1.5, V1.6): Only converting Setup file (Binary data) into Text data. For Japanese market model only. (4) WJ-NV200(V2.5, V2.6): Only converting Setup file (Binary data) into Text data. - Fixed an issue that authentication information (input value at option) would not be effective properly for communicating with WJ-ND400.
				x	<b>6. Upgrade Firmware</b> - Improved operability by the detecting conditions of WJ-ND400 to be common for all menu. - unified the terms in which the expression was different in each menu
5.7.0.3 June,'16	C			x	<b>1. Overview;</b> - Improved operability by centralizing credential of the login such as User name and Password. Keep all settings between "Panasonic Security System Configuration Tool" and credential of the login (optional setting values) to be stored. - Improved operability by reducing steps as discarding manual choice of Network Interface card (NIC) each time starting up.
				x	<b>2. Configure Devices (This was named "Configure Cameras");</b> - Improved device authentication to prevent unintended access by unknown third party, by improved operability at Administrator Registration; Improved detecting registration status of each device (improving accuracy) on WJ-ND400 over router. - Supported new components: WV-SFN110(H), WV-SFN130(H), WV-SFV110(M)(H), WV-SFV130(M)(H) ; Supported sending listed configurations to selected cameras. - Improved User Interface (UI); Improved operability for detecting error to be made by moving devices at editing each settings of IP addresses menu. Improved visibility by changing range of target device which is to be edited from end-stop to rotation. - Fixed an issue that saved settings (CameraConfig.csv) may be able to open. - Fixed an issue that an incorrect value in the column of WV-GXE500 may be displayed after clicking Download button at "Download Current Settings from devices" of "Confirm Status of Devices".
				x	<b>3. Configure Recorders;</b> - Improved device authentication to prevent unintended access by unknown third party, by improved operability at Administrator Registration. Improved users to edit new Administrator Setting screen for WJ-ND400 version 5.3 (and newer) at Configure Recorders. - Revised an error message of delaying communication response by invalid DNS configuration on WJ-ND400
				x	<b>6. Upgrade Firmware</b> - Fixed no serial numbers of recorder were listed. - Fixed a deviating list if an i-pro/switch (switching hub) device without IP address setting were exist within the network.

	A	B	C	U	
5.9.0.1 Dec.,'16	C			x	<b>2. Configure Devices (This was named "Configure Cameras");</b> - Supported new cameras: WV-S1132, WV-S1131, WV-S1112, WV-S1111, WV-S1531LN, WV-S1511LN, WV-S2531LN, WV-S2511LN, WV-S2231L, WV-S2211L, WV-S2131L, WV-S2131, WV-S2130, WV-S2111L, WV-S2110, WV-V2530L1, WV-V2530LK, WV-V1330L1, WV-V1330LK (Device detection, IP address setting, Administrator initial setting and Starting browser only) - For Chinese version only; Fixed display of "禁止" and "允许" at some setting menu were reversed. - Fixed that unnecessary message may be displayed when downloading Device Configuration List.
				x	<b>3. Configure Recorders;</b> - In WJ-ND400 editor; enhanced error checking if the camera port number at configuration of camera were blank.
				x	<b>4. Download Configuration Files and Log Files from Devices;</b> - Supported new cameras: WV-S1132, WV-S1131, WV-S1112, WV-S1111, WV-S1531LN, WV-S1511LN, WV-S2531LN, WV-S2511LN, WV-S2231L, WV-S2211L, WV-S2131L, WV-S2131, WV-S2130, WV-S2111L, WV-S2110
				x	<b>5. Upload Configuration Files to Devices;</b> - Supported new cameras: WV-S1132, WV-S1131, WV-S1112, WV-S1111, WV-S1531LN, WV-S1511LN, WV-S2531LN, WV-S2511LN, WV-S2231L, WV-S2211L, WV-S2131L, WV-S2131, WV-S2130, WV-S2111L, WV-S2110 - Improved accepting double-byte characters and spaces in the path of firmware storage folder.
5.9.0.2 Jan.,'17	C			x	<b>4. Download Configuration Files and Log Files from Devices;</b> - Appeared "please try again with the recorder's DNS set to OFF (DNS of recorder is unreachable)" and failure to download log file from recorders (HD/ND/NV series) even if the recorder's DNS were "OFF".
5.9.1.7 Mar.,'17	C			x	<b>1. Overview;</b> - Support HTTPS protocol. - Improved operability Support Language selection among Japanese, English and Chinese. Modified grouping of option menu. Supported displaying version information at each sub-menu.
				x	<b>2. Configure Devices (This was named "Configure Cameras");</b> - Supported new component and Firmware WJ-NX400(V1.02): [Detect Devices/Administrator Registration/Starting up web browser Fixed an issue: Unable to editing IP address assignment if detecting a device which is configure "DHCP=ON" although existing no DHCP server (detecting IP address is "0.0.0.0").
				x	<b>3. Configure Recorders;</b> - Supported new component and Firmware WJ-NX400(V1.02): [Converting parameters to csv]
				x	<b>4. Download Configuration Files and Log Files from Devices;</b> - Supported new component and Firmware WJ-NX400(V1.02): For upgrading firmware of WJ-NX400, please turn it OFF once and ON before upgrading. On WV-SW458/SF448/SF438: Improved preservation / restoration accuracy of setting parameters.
				x	<b>5. Upload Configuration Files to Devices;</b> - Supported new component and Firmware Recorders; (1) WJ-NX400 (V1.02)
				x	<b>6. Upgrade Firmware</b> - Supported new component and Firmware Recorders; (1) WJ-NX400 (V1.02)

				x	<p><b>1. Overview;</b>                      - Changed company name from Panasonic System Networks Co., Ltd. to Panasonic Corporation.</p>
				x	<p><b>2. Configure Devices (This was named "Configure Cameras");</b>                      - Supported New cameras (i-PRO EXTREME series).                      Expecting settings of OSD display position and Image asjust to be supported on next version.                      - Supported new cameras;                      WV-X6531, WV-X6511, WV-V1170 and WV-V6430L                      - Supported the IP Address settings for both NX400 camera/PC port and PC Port.                      - Improved operability on choices of settings                      Deleted double scroll function.                      Foldable some menu settings.                      - Improved operability on Administrator Registration                      Made available to collect the default settings of Administrator Registration even if the dvices were in SSL communication over router.</p>
				x	<p><b>3. Configure Recorders;</b>                      - Supported "Create and / or Edit the Recorder Configuration File" on WJ-NX400/WJ-NV300                      - Supported new component and Firmware                      WJ-ND400 (V5.6) and WJ-NV300 (V1.8).</p>
				x	<p><b>4. Download Configuration Files and Log Files from Devices;</b>                      - Supported new component and Firmware                      WJ-ND400 (V5.6) and WJ-NV300 (V1.8).                      WV-X6531, WV-X6511, WV-V1170 and WV-V6430L</p>
				x	<p><b>5. Upload Configuration Files to Devices;</b>                      - Supported new component and Firmware                      WJ-ND400 (V5.6) and WJ-NV300 (V1.8).                      WV-X6531, WV-X6511, WV-V1170 and WV-V6430L</p>
			x	<p><b>6. Upgrade Firmware</b>                      - Supported new component and Firmware                      WJ-ND400 (V5.6) and WJ-NV300 (V1.8).                      WV-X6531, WV-X6511, WV-V1170 and WV-V6430L</p>	

Added on May 19,2017

**Important Information for WJ-NX400 users:**  
 When you upgrade the firmware on WJ-NX400, once power off and on of WJ-NX400 before upgrading. If it were failed, please try it again after turning off and on of WJ-NX400.

6.1.0.1 July,'17	C			x	<p><b>1. Overview;</b>                      - Improved the initial value of the range to detect ND 400.                      Improved to handle 15 units from the last address in the same segment as the PC running PSSCT as the initial value of WJ-ND400 detection range.                      - Improved the wording and translation of display.</p>
				x	<p><b>2. Configure Devices (This was named "Configure Cameras");</b>                      - Supported new function                      For i-PRO EXTREME series H.265 cameras: Setting for OSD position                      - Supported new component and firmware                      For NX200 V1.0x: Supported Detection, Factory default of administrator/Starting WEB Browser/Configuration of IP Address.</p>
				x	<p><b>3. Configure Recorders;</b>                      - Supported new component and firmware                      - Supported new component and firmware                      For NX200 V1.0x: Supported Detection, Factory default of administrator/Starting WEB Browser/Configuration of IP Address.</p>

This document describes "i-Pro Config Tool" upgrade Information.  
 1. Release version: Version 6.1.0.1  
 2. Release Note Reference Number: Security\_Sys\_Config\_Tool\_6.1.0.1
