

Panasonic Security Viewer

Panasonic Security Viewer is an application that can view the images from Panasonic i-PRO SmartHD Network Camera, Network Disk Recorder (WJ-NV200K/WJ-ND400K/WJ-NX400K). By connecting a terminal to a 3G/4G or wireless LAN (Wi-Fi), it is possible to view live images from the network camera and recorded images stored on recorders.

- Features

1) Network recorder / Digital Video Recorder

1-1) Live images: To control the live images from the network cameras.

1-2) Playback recorded images: To play back the images stored on the recorder.

- Normal / low load Playback

- Mobile Playback feature (only WJ-NX400K)

1-3) Time & date search: To search the images to play back based on the time & date.

2) Network camera

2-1) Live images: To control the live images from the network cameras.

2-2) Playback recorded images: Playback the images stored on SD card (H.264/H.265, No sound)

- Playback the images stored on SD card of i-PRO SmartHD Network Camera (only H.264))

- Playing back the images stored on SD card of i-PRO EXTREME Network Camera (H.264/H.265)

2-3) Time & date search: To search the images to playback based on the time & date.

2-4) Event search: To search the event images to playback based on the start time & date and end time & date

- How to use
